BELL POTTER GUIDED PORTFOLIO SERVICE MODEL PORTFOLIOS

The Guided Portfolio Service (GPS) offers a variety of model portfolios. You can select one model portfolio or combine different portfolios to meet your investment needs.

More detailed information about each model manager and key information about the model portfolios are listed in the following pages.

Please note that information related to statements of risk of each model portfolio are based on the Australian Prudential Regulation Authority's (APRA's) Standard Risk Measure (SRM) calculated by the model manager. The SRM is based on industry guidance to allow investors to compare investment options that are expected to deliver a similar number of negative annual returns over any 20-year period.

The SRM is not a complete assessment of all forms of investment risk, for instance it does not detail what the size of a negative return could be or the potential for a positive return to be less than an investor may require to meet their objectives.

Further, it does not take into account the impact of administration fees and tax on the likelihood of a negative return. Investors should still ensure they are comfortable with the risks and potential losses associated with their chosen investment option.

Information related to indirect costs is correct as at 30 May 2018. These are the weighted average management costs of the underlying funds in the model portfolio and can be expected to change over time as asset allocations and underlying investment vehicles change. These costs do not include (i) any transaction costs investors might bear when their portfolios are rebalanced in line with the model portfolios, or when entering/ exiting the model portfolios, or (ii) any costs charged for use of the GPS. Please see your GPS brochure for details of these fees. The indirect costs also do not include any fee that may be remitted to your adviser.

BetaShares Model Portfolios

[About the model manager – BetaShares](#)

BetaShares is a leading Australian manager of exchange traded funds (ETFs) and other exchange traded products, which trade on the Australian Securities Exchange (ASX). BetaShares' aim is to create intelligent investment solutions that broaden the investment possibilities for Australian investors and their advisers. As at May 2018, BetaShares manages over \$5.5 billion in assets.

BetaShares was founded in Australia by a team of experienced Australian investment professionals who still own and run the business today.

In addition, BetaShares benefits from a strategic shareholder in Mirae Asset Global Investments, one of Asia's largest investment managers. As at May 2018, Mirae manages over US\$120 billion.

As an Australian born and managed firm, BetaShares thinks deeply about factors affecting Australian investors and builds products specifically for Australians. BetaShares' local focus has allowed the team to build the largest and most innovative suite of exchange traded products in Australia.

BetaShares Balanced ETF Model Portfolio

Investment objective To produce total returns (before fees) of CPI + ~ 3.0% p.a. over a rolling 5-year period, balanced between income and capital, subject to a likelihood of no more than 3 negative return years, on average, every 20 years.

Who may this model portfolio be suitable for? The portfolio may be suitable for investors with an investment horizon of at least 5 years and who are comfortable with a “medium” risk strategy in accordance with the APRA’s “standard risk measure”.

Investment strategy The portfolio seeks to achieve its investment objectives through exposure to different asset classes, including bonds, cash, commodities and Australian and International equities. The Portfolio gains exposure to these asset classes and investment strategies through exclusive use of ASX-traded ETFs and other exchange-traded products. Asset allocations are dynamically adjusted over time based upon the prevailing macro and micro environment.

Asset classes	Allocation range (%)
Cash	0% - 25%
Australian Bonds	5% - 35%
International Bonds	5% - 30%
Australian Property	5% - 15%
Australian Equities	5% - 40%
International Equities	5% - 35%
Gold	0% - 15%

Statement of risk Up to an estimated 3 negative annual returns in every 20 years.

Indicative number of holdings 9

Indirect costs Approximately 0.27% p.a.

BetaShares Growth ETF Model Portfolio

Investment objective	To produce total returns (before fees) of CPI + ~ 3.75% p.a. over a rolling 5-year period, tilted toward capital growth, subject to a likelihood of no more than 4 negative return years, on average, every 20 years.																
Who may this model portfolio be suitable for?	The portfolio may be suitable for investors with an investment horizon of at least 5 years and who are comfortable with a “medium-to-high” risk strategy in accordance with the APRA’s “standard risk measure”.																
Investment strategy	<p>The portfolio seeks to achieve its investment objectives through exposure to different asset classes, including bonds, cash, commodities and Australian and International equities. The portfolio gains exposure to these asset classes and investment strategies through exclusive use of ASX-traded ETFs and other exchange-traded products.
